

# FRANCO PESCE

## EXPERIENCE

### Ensolvers - Software Developer (January 2023 - Present)

FullStack development for various projects, ensuring their efficiency and security. Used technology:

- Java Springboot
- Redis
- Kafka
- React with Vite

### TripMark - Backend Developer (October 2023 - Present)

Development of the complete backend of a medical application. The backend was developed with Java Springboot and using the following tools:

- Auth0
- Postgres with supabase
- Firebase for file management
- File encryption

### Red Link Training (June 2022 - August 2022)

In this training, I learned how to develop a buying and selling website with the following characteristics:

- I used Angular for the FrontEnd
- I used Springboot for the BackEnd
- I used MySQL for the database
- I learned about layout, UX and consumption of REST APIs, both from the FrontEnd and the BackEnd.
